

## REMOTE CONTROL TRANSCEIVER TYPE 573

The Remote Controller Transceiver is an option that may be added to most MS Instruments PLC training and Ballistic Data Systems. It is used to replace cabling where it is inconvenient or not viable.

The units can be provided as standalone units or integral to the other system components.

A range of transmission frequencies and power outputs are available to suit the operating environment. The standard system, operating at 458MHz will communicate with a target system placed at a distance of up to 3Km from the Firing Point.

### SPECIFICATION

<b>Electrical</b>	
Supply Voltage	12V DC
Supply Current	150mA (receive) 750mA (transmit)
<b>R F Characteristics</b>	
Frequency	450-470MHz (standard) 400-500MHz (optional)
Channel Spacing	20KHz
Power O/P	5mW/500mW (switchable)
Type Approval	MPT 1329
<b>Physical Characteristics</b>	
Weight	2 Kg
Length	220 mm
Width	120 mm
Height	90 mm
Temperature (Operating)	-10 to +55 °C
