

IR FLASH BEACON TYPE 768-100

This unit provides a high-power flash in the infra-red region for the purpose of testing and aligning the MS Instruments PLC Flash Detector type 768.

It can operate in continuous flashing mode, manual mode, or can be triggered externally to provide a system self-test function.

Power is 9v Battery (IEC 3R12)

The unit is in a weather-proof housing and is mounted on a tripod.
